

SANTHOSH KUMAR R

SENIOR SOFTWARE ENGINEER

Bangalore, Karnataka 560066 • +91-7012337385 • santhoshk728@gmail.com

PROFESSIONAL SUMMARY

Results-driven Senior Software Engineer with 7+ years of experience building scalable backend and full-stack systems across AI, fintech, and enterprise domains.

Specialized in Python and Golang with expertise in cloud-native architectures, GenAI integrations, CI/CD, observability, and automation.

Proven success in platformization, reducing operational costs, and leading system modernization efforts.

Seeking opportunities in top-tier tech companies where engineering excellence and innovation intersect.

SKILLS

Python (Flask, FastAPI, Django), Go, JavaScript (React), Bash, Shell scripting

Terraform, Pulumi, Jenkins, GitHub Actions, Docker, Kubernetes, ArgoCD, Git

Microservices, Serverless, REST APIs, Event-driven systems, WebSockets, FIX Protocol

Grafana, CloudWatch, Custom dashboards, Logging and monitoring tools

MuleSoft (IPAAS), Jira, Confluence, Notion

AWS (Lambda, EKS, S3, IAM, DynamoDB), Azure (App Services, Functions, Databricks)

SQL, NoSQL (DynamoDB), Apache Kafka, AWS SQS, Delta Lake, Fivetran, 3PI connectors

CI/CD, Infrastructure as Code, GitOps, Automation-first engineering

Pytest, Unit and integration testing, Appium, PCloudy

WORK HISTORY

Senior Applications Engineer

Databricks - Bangalore

11/2023 - Current

- Led enterprise automation efforts integrating GenAI workflows and internal platforms.
- Built scalable microservices using Python, Go, Flask on AWS Lambda, EKS, and Azure Functions.
- Developed CI/CD pipelines with Terraform, Pulumi, Jenkins, GitOps using ArgoCD.
- Designed GenAI platform integrations with Delta Lakehouse, Fivetran, and Databricks AI Bricks.
- Created internal tools with React on Databricks Apps for configuration and monitoring.
- Reduced month-end finance close time by 60% via automated workflows with Salesforce, Workday, and NetSuite.

Senior Software Engineer (Contract)

FalconX - Bangalore

01/2023 - 11/2023

- Developed high-performance trading systems using Go and Python for institutional clients.
- Built resilient APIs using FIX Protocol, WebSockets, and concurrent programming.
- Integrated U.S. banking partners for secure fiat-crypto transfers.
- Architected event-driven services with Apache Kafka and deployed via GitOps (Jsonnet + ArgoCD).
- Automated CI/CD and containerization with Docker and Kubernetes.

Senior Software Engineer (Contract)

Databricks - Bangalore

03/2022 - 01/2023

- Developed Python microservices on AWS Lambda/EKS and Azure App Services.
- Built event-driven jobs and message processing workflows.
- Implemented Jenkins pipelines for deployments and automated testing.

Senior Software Engineer (Contract)

Cambridge Mobile Telematics

08/2021 - 03/2022

- Built APIs and backend logic in Django for mobile telematics data.
- Automated validation using Appium, PCloudy, and integrated testing dashboards.

- Improved performance of telemetry services, reducing manual QA efforts.

Senior Software Engineer (Contract)

ELOTL

02/2021 - 08/2021

- Engineered Kubernetes observability tool using Flask and Python client.
- Enabled real-time monitoring for AWS EKS Fargate-based clusters.
- Delivered deployable dashboards with actionable metrics.

Software Engineer (Contract)

Devcon

11/2020 - 02/2021

- Created vulnerability scanning engine using Python and AWS Batch.
- Integrated scanner with CI/CD for DevSecOps automation.

Software Engineer (Contract)

Scrapy Cloud

12/2019 - 10/2020

- Built a GCP-based web scraping pipeline using Scrapy + BigQuery.
- Reduced crawl time by 35% using dynamic throttling and batching.

Software Engineer (Contract)

Mathrubhumi

05/2019 - 12/2019

- Delivered Django-React full-stack CRM platform for sales.
- Deployed on AWS EC2/S3/RDS with CI/CD; reduced manual effort by 60%.

EDUCATION

B.Tech: Computer Science

Nehru College of Engineering and Research Centre - Kerala

04/2016

Diploma: Web Development

Recursive Tech - Kerala

04/2019

Internship: CCSP Java

CMS IT Services - Kerala

04/2017

WEBSITES, PORTFOLIOS, PROFILES

ACCOMPLISHMENTS

- Spearheaded automation-first engineering efforts that slashed manual finance processes, cutting month-end close times by 60% and increasing reporting accuracy.
- Played a key role in platform modernization, leading to 40% faster internal data pipelines and significant gains in developer productivity.
- Integrated multi-cloud systems (AWS + Azure) with seamless CI/CD, improving deployment reliability and reducing incidents by 70%.
- Built trading APIs handling thousands of real-time transactions per second with 99.99% uptime at FalconX.
- Developed Kubernetes observability tooling that decreased issue triage times by 50% for customer environments.
- Orchestrated GenAI integration into enterprise systems, enabling LLM workflows and empowering business teams with self-service automation.
